**Mumbai, (October 30, 2012):**

One of the major developments during the quarter was that the Government of India for the first time in September 2012 introduced a cap on supply of LPG Cylinders. The number of subsidized Cooking Gas Cylinders is now capped to six or nine per household per year. This means the Supply of household cylinder will get restricted and the Consumers will have to pay Market Price for cylinders beyond six or nine.

This reform is expected to curb the diversion of subsidized Cooking Gas Cylinder to the Commercial and Auto gas usage. This will enlarge Commercial / Auto gas market and create a Level playing field for Parallel Marketers. Aegis is poised to capitalise on this opportunity in the Gas Distribution business.
